

NOOR

RUGS | Indoor
BAXTER P.

Inspired by the Arabic word Nur, meaning "light," the Noor rug introduces a refined play of transparency and luminous nuances into interiors, evoking the delicate effect of neon in a decorative key. Designed as a "visual tray" to highlight armchairs, reading corners, or study areas, Noor is a compact-sized rug, ideal for enhancing even small spaces. Made of 100% New Zealand wool with a very high pile, it stands out for its height variations that give the surface dynamism and depth. The color combinations are offered in two versions: the circular one plays with shades of mint green, dark green, and praline, while the square version pairs cyclamen, violet, and orange for a bold yet balanced visual impact. Entirely hand-knotted and finished, Noor is a decorative piece that transforms any space with a visual language made of light, color, and material.

Model: noor is a collection consisting of a series of carpets with two different linear gradients and two opposing height differences from 2.5 cm to 1 cm.

Structure: hand-knotted carpet made of 100% New Zealand wool, pile height 2.5 cm, hand-finished with tone-on-tone edging.

A distinctive feature of the carpet is the gradient colour in contrast with the natural colours dyed through the fibre.

Dimensions can vary by +/- 5%.
